

How to attempt ZenQ Assessment for Test Engineer Role (Intern) via Xplore

Scenario 1: Applicants received an email from Xplore for the assessment

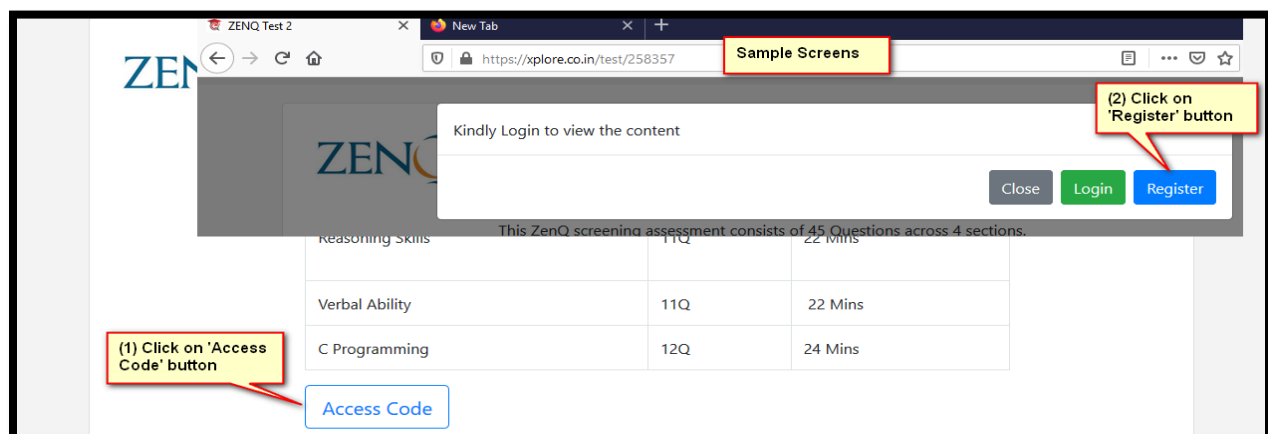

Step 1: Applicants to click on Assessment link from the received email

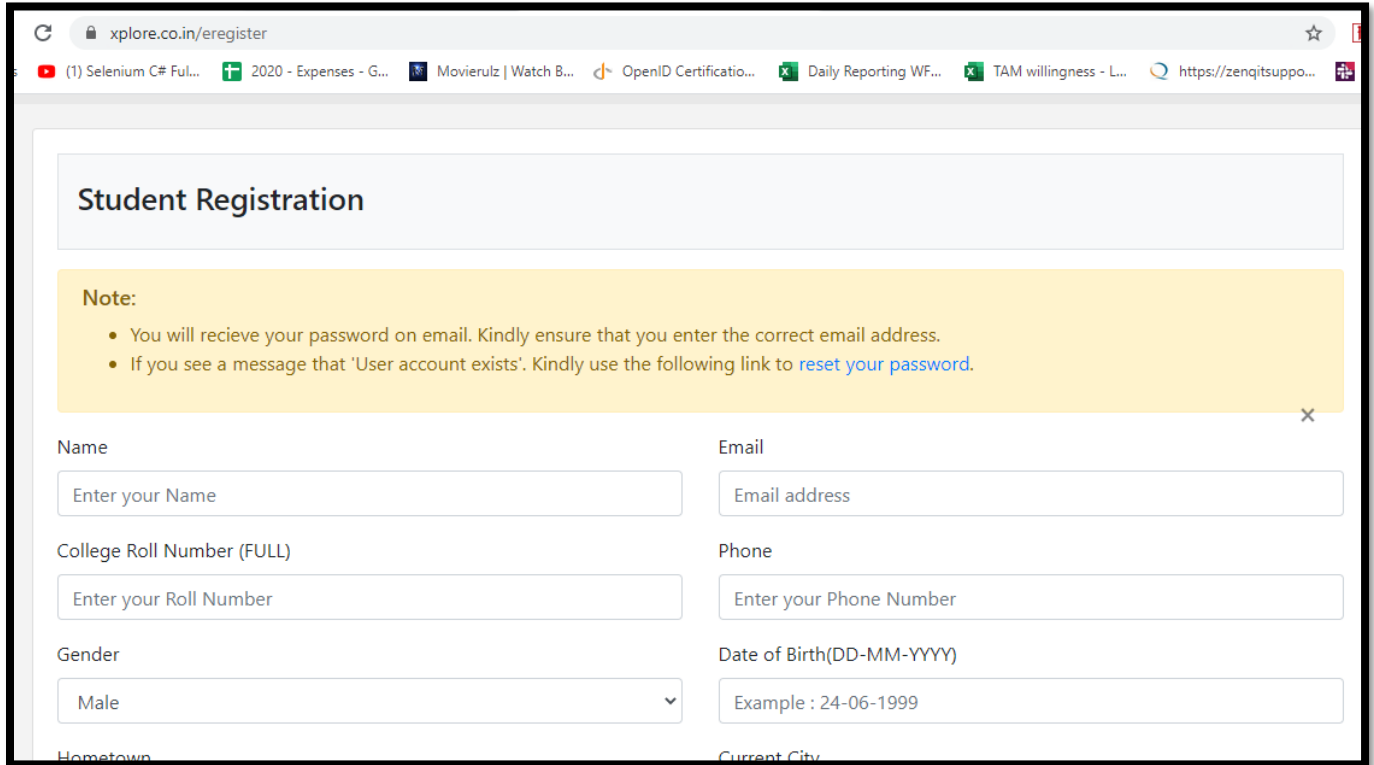

Step 2: Click on Access code

Step 3: Click on Register buttons

Note: Turn ON Camera always during the test and all applicable screens

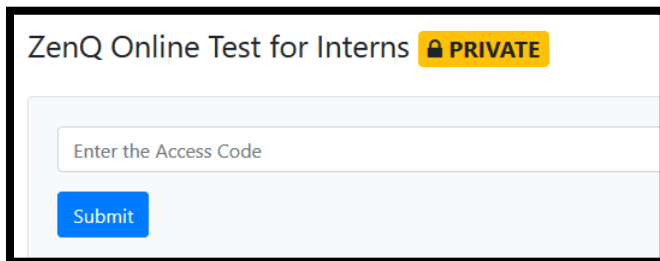

Step 4: Make sure to provide accurate information in Student Registration page, any data mismatch would cause a disqualification/interruption to assessment

The screenshot shows the 'Student Registration' page. At the top, there's a header with the URL 'xplore.co.in/eregister'. Below the header, a yellow box contains a 'Note' with two bullet points: 'You will receive your password on email. Kindly ensure that you enter the correct email address.' and 'If you see a message that 'User account exists'. Kindly use the following link to [reset your password](#).' Below the note, there are several input fields: 'Name' (with placeholder 'Enter your Name'), 'Email' (with placeholder 'Email address'), 'College Roll Number (FULL)' (with placeholder 'Enter your Roll Number'), 'Phone' (with placeholder 'Enter your Phone Number'), 'Gender' (a dropdown menu with 'Male' selected), and 'Date of Birth(DD-MM-YYYY)' (with placeholder 'Example : 24-06-1999'). At the bottom, there are partially visible fields for 'Hometown' and 'Current City'.

Step 5: On completing the registration, enter the access code (can be copied from email or make a note of it and enter in the requested field)

The screenshot shows the 'ZenQ Online Test for Interns' page. It has a yellow 'PRIVATE' label with a lock icon. Below this, there is a text input field with the placeholder 'Enter the Access Code' and a blue 'Submit' button.

Step 6: On submitting the access code, assessment starts (use navigation buttons to move between questions; Click on End test to finish the attempt)

Note: Swapping between windows/tabs/applications during the assessment, would END the attempt.

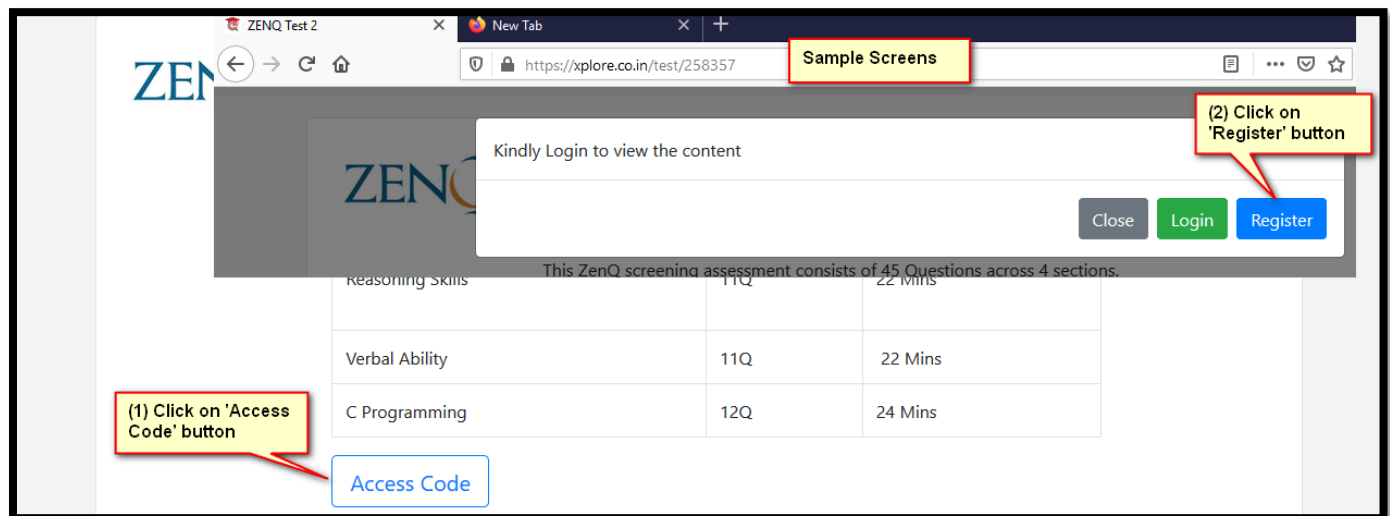

Scenario 2: Applicants did not receive an email from Xplore for the assessment

Step 1: Applicants to launch Assessment link <https://xplore.co.in/test/361239> in a browser

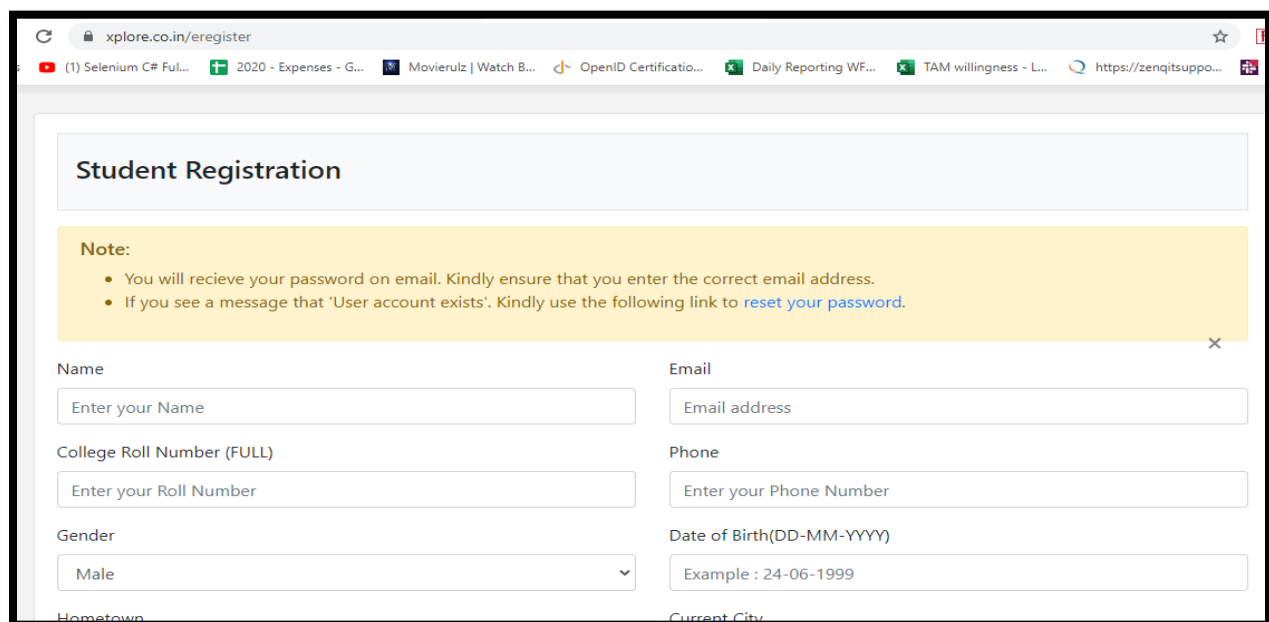

Step 2: Click on Access Code button

Step 3: Click on Register button

Note: have your camera – turned ON always

Step 4: Make sure to provide accurate information in Student Registration page, any data mismatch would cause a disqualification/interruption to assessment.

The screenshot shows the "Student Registration" page on xplore.co.in/eregister. A note at the top states: "Note: You will receive your password on email. Kindly ensure that you enter the correct email address. If you see a message that 'User account exists'. Kindly use the following link to [reset your password](#)." Below the note, there are input fields for the following information:

- Name: Enter your Name
- College Roll Number (FULL): Enter your Roll Number
- Gender: Male (dropdown menu)
- Email: Email address
- Phone: Enter your Phone Number
- Date of Birth(DD-MM-YYYY): Example : 24-06-1999
- Hometown: (input field)
- Current City: (input field)

Step 5: On completing the registration, enter the access code [ZENQ123](#) in the requested field

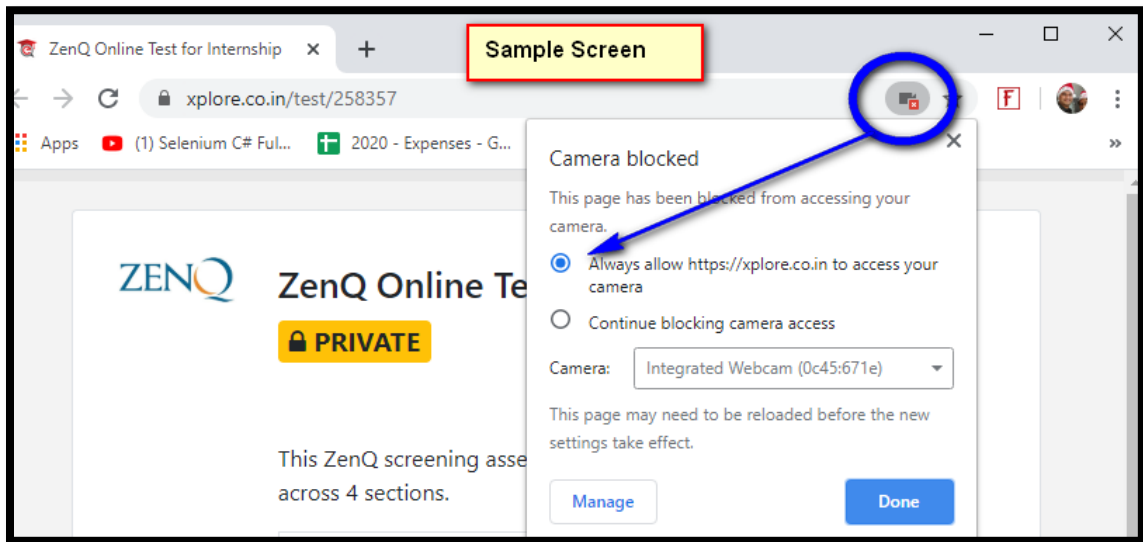

A screenshot of a web interface for a ZenQ Online Test for Interns. The title "ZenQ Online Test for Interns" is displayed in a dark font, followed by a yellow badge with a lock icon and the word "PRIVATE". Below this is a light gray rectangular box containing a text input field with the placeholder text "Enter the Access Code". At the bottom left of this box is a blue button with the word "Submit" in white text.

Step 6: On submitting the access code, assessment starts (use navigation buttons to move between questions; Click on End test to finish the attempt)

Note: Swapping between windows/tabs/applications during the assessment, would END the attempt.

How to Enable the Camera option in a browser:

1. By default, Camera is enabled during the test (or) browser requests you to enable Camera from Access code pages.
2. If camera is turned off, to turn it on – follow below,
 - a. Click on video camera icon in address bar of the browser
 - b. Select option 'Always allow...'
 - c. Save the changes
 - d. Refresh the page
 - e. Camera gets enabled
